

Step by Step instructions to find FBDI Import templates on Oracle Help Center

File-Based Data Import Templates are used to import supplier data from external sources into Oracle Fusion Procurement Cloud. The templates are routinely enhanced to incorporate new functionality and may differ from one quarterly update to another. These templates are available on the Oracle Help Center and here are the step by step instructions to locate them for a given update. It is recommended that you use templates that correspond to your current update.

1. Access the [Oracle Help Center](#) and navigate to [Cloud Documentation](#).

The screenshot shows the Oracle Help Center homepage. At the top, the Oracle logo and 'Help Center' text are visible. Below this is a large heading 'How can we help?' followed by a welcome message. The main content area is divided into two columns. The left column is titled 'Solutions' and contains icons for design, development, integration, and operation. The right column is titled 'Cloud' and contains a cloud icon. This 'Cloud' section is highlighted with a red rounded rectangular border.

ORACLE Help Center

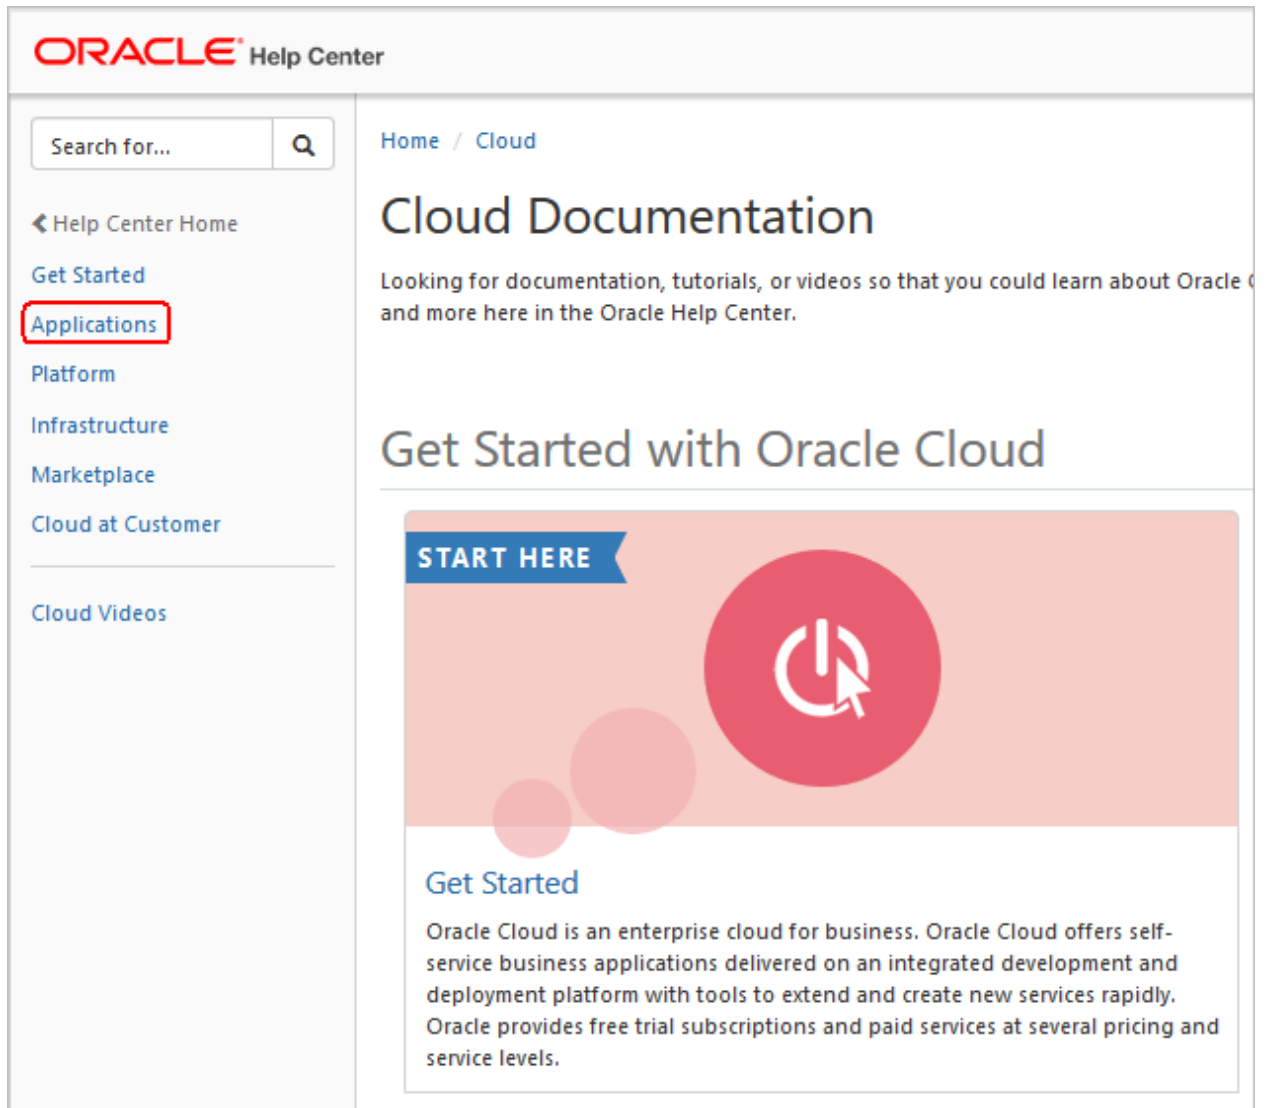

How can we help?

Welcome to the Oracle Help Center. Whether you are new to Oracle or an advanced user, you can find useful information about our products and services with targeted solutions, getting started guides, and content for advanced use cases.

Solutions
Architectures to design, develop, integrate, and operate

Cloud
A broad selection of enterprise solutions for cloud computing

2. Click on the Applications link that appears on the left.
